

Incoming payments

Receive payments in foreign currencies.

Simplify your accounts receivable process and eliminate barriers of overseas banking.

Increase your competitive advantage by offering your customers payment options in their local currencies, making it easier to do business with you.

Rate alerts

Set rate alerts to target your ideal exchange rate and improve your bottom line. It's a great way to save money.

24/7 management

Our all in one payment portal allows for 24/7 access, transparent pricing, multiple payment and settlement options, and awesome customer support.

Receipt notifications

Receive notifications on receipt of incoming payments so you're always informed on every incoming payment and the availability of your funds.

Give customers payment options

Offer convenient payment options so that your customer can pay in local currencies. Receive funds with relative ease while avoiding the complexities of opening and managing foreign bank accounts.

Simplify reconciliation

Automate your receivable processes. Receive notifications on receipt of incoming payments, reconcile every payment online, and upload it to your accounting system as paid. That's it. Simple, effective and streamlined.

Reduce costs

Improve your bottom line by taking advantage of transparent exchange rates before deciding whether to convert or hold foreign currency funds for future use.

Take control of your incoming payments through better visibility and control and accept payments effortlessly into one of your multi-currency accounts.
